Nature Of Opinion

Docket Number: L-00000YY-15-0318-00171

Docket Position: Against

I am strongly opposed to the siting of the proposed transmission lines through the San Pedro River Valley. This is a pristine critical habitat and should not be disturbed for power lines. Much effort and money has been expended to protect this valuable area, and there are better routes for the power line which would not be nearly as damaging. The greater public benefit should be respected leaving this area as it is, and not permitting a private company to make a large profit while damaging our lands.

Nature Of Opinion**Docket Number:** L-00000YY-15-0318-00171**Docket Position:** Against

We purchased land 10 years ago in the San Pedro River Valley (SPRV). The land has extensive conservation easements that protect six miles of the river from development and significantly limit water usage. We bought the land as a part of conservation efforts to protect the river and animals, including thousands of migratory birds that use the river as a natural pathway. Sun Zia power lines in the SPRV will diminish this conservation effort as well as diminish the value of our property. A project of this magnitude causes direct and indirect habitat fragmentation to the detriment of the land. Construction work, access roads and the power lines will cause erosion and negatively impact the San Pedro River's watershed. The FEIS acknowledges this, FEIS p. J-299. Our requested remedy is that Sun Zia should not be approved through the SPRV. The San Pedro River Valley is unique. Birds, mammals and reptiles depend on the river habitat. This habitat should not be despoiled by this project.
